

FEDERAL OLD-AGE AND SURVIVORS
INSURANCE TRUST FUND

LETTER

FROM THE

BOARD OF TRUSTEES OF THE FEDERAL
OLD-AGE AND SURVIVORS INSURANCE
TRUST FUND

TRANSMITTING

PURSUANT TO LAW THE THIRTEENTH ANNUAL REPORT
OF THE BOARD OF TRUSTEES OF THE FEDERAL OLD-
AGE AND SURVIVORS INSURANCE TRUST FUND

MAY 20 (legislative day, MAY 15), 1953.—Referred to the Committee
on Finance and ordered to be printed

UNITED STATES
GOVERNMENT PRINTING OFFICE

LETTER OF TRANSMITTAL

BOARD OF TRUSTEES OF THE FEDERAL
OLD-AGE AND SURVIVORS INSURANCE TRUST FUND,
Washington, D. C., March 1, 1953.

The PRESIDENT OF THE SENATE,
The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
Washington, D. C.

SIRS: We have the honor to transmit to you the Thirteenth Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance Trust Fund, in compliance with the provisions of section 201 (b) of the Social Security Act, as amended.

Respectfully,

GEORGE M. HUMPHREY,
*Secretary of the Treasury, and
Managing Trustee of the Trust Fund.*

MARTIN DURKIN,
Secretary of Labor.

OVETA CULP HOBBY,
Federal Security Administrator.

ARTHUR J. ALTMAYER,
*Commissioner for Social Security
and Secretary, Board of Trustees.*

THIRTEENTH ANNUAL REPORT OF THE BOARD OF TRUSTEES OF THE FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND

INTRODUCTORY STATEMENT

The Federal old-age and survivors insurance trust fund was established on January 1, 1940, under the provisions of section 201 of the Social Security Act, as amended. The fund is held by the Board of Trustees comprised of three ex officio members: the Secretary of the Treasury, who is also the managing trustee; the Secretary of Labor; and the Federal Security Administrator. The Commissioner for Social Security is secretary of the Board. This report is submitted jointly by the three trustees.

As required by law, the report describes the operations of the trust fund during the fiscal year ended June 30, 1952, the expected receipts and disbursements during the 5 fiscal years 1953-57, and the long-range actuarial status of the fund. It also discusses the effect of the 1950 and 1952 amendments on the operations of the trust fund.

Fiscal year 1952 was the first full year of operation of the Social Security Act amendments of 1950 (Public Law 734, 81st Cong.) which liberalized the eligibility requirements, raised the benefits, increased the amount a beneficiary could earn in covered employment and still receive benefits, and extended the coverage of the insurance program. Both the income and the disbursements of the trust fund were substantially increased by these amendments. The Social Security Act amendments of 1952 (Public Law 590, 82d Cong.) which became law soon after the close of the fiscal year reviewed in this report, provided further increases in benefits and in the amount of covered earnings a beneficiary may have and still receive benefits, and extended the period of active military and naval service for which old-age and survivors insurance wage credits will be granted.

The operations of the trust fund are influenced by economic as well as legislative developments. In fiscal year 1952 employment and earnings continued to rise. Total civilian employment averaged 61.2 million, or 0.6 percent higher than in fiscal year 1951, and unemployment averaged 1.8 million as compared with 2.2 million in 1951. Payrolls in civilian employment totaled about \$165.7 billion, about \$12.7 billion above payrolls in fiscal year 1951.

The extended coverage under the 1950 amendments, combined with the rise in employment and earnings, increased the number of persons reported in employment covered by old-age and survivors insurance to about 58 million during calendar year 1951 as compared with 48 million during calendar year 1950. The estimated number of persons in covered employment during calendar year 1952 is about 60 million. Total taxable earnings reported for calendar year 1951 were \$121

billion as compared with \$87 billion in calendar year 1950; taxable earnings in calendar year 1952 are estimated at \$129 billion.

Receipts and disbursements of the trust fund rose to a new high in fiscal year 1952. The contribution income was \$3,594 million, an increase of \$474 million over fiscal year 1951. Benefit payments rose by \$484 million and totaled \$1,982 million. The total number of beneficiaries in June 1952 was 4,594,000 or 14 percent more than in June 1951. Retirement beneficiaries (including entitled wives, dependent husbands, and children of old-age beneficiaries) numbered 3,110,000 in June 1952 or 13 percent more than 1 year earlier. There were 1,484,000 survivor beneficiaries in June 1952 or 15 percent more than in June 1951. During the fiscal year the trust fund received interest of \$334 million and increased its assets to a total of \$16,600 million.

The economic consequences of hostilities in Korea, the defense preparations, and the programs for economic and military aid to other nations will have far-reaching effects on the operations of the trust fund, both short range and long range. These consequences, resulting for example from higher money earnings in covered employment, increased employment of women, and deferred retirement of older workers, cannot be fully appraised at this time but as far as possible they are taken into account in this report.

Because it is difficult to foresee economic developments during the next 5 years, the assumptions on which the Board has based its estimates of the expected operations of the trust fund during this period are subject to many uncertainties. In many respects developments over the much longer period covered by the discussion of the actuarial status of the trust fund are even more uncertain. The detailed report that follows, therefore, should be read with full recognition of the difficulties of estimating future trust fund income and disbursements under changing economic conditions.

SOCIAL SECURITY ACT AMENDMENTS OF 1950 ¹

The 1950 amendments to the Social Security Act, which represented the first major legislative changes in the old-age and survivors insurance program since enactment of the 1939 amendments, became law during the early part of the fiscal year ending June 30, 1951. These changes in the law will have far-reaching effects on the level and incidence of income and disbursements of the trust fund both in the immediate and long-term future. Coverage was extended to a number of classes of employees as well as to most nonagricultural self-employed persons hitherto excluded. The requirements necessary to qualify for receipt of benefits were relaxed greatly. Benefit amounts payable to present and future beneficiaries were increased substantially. A schedule of contribution rates was adopted which Congress believed will make the system self-supporting.

The more important changes significant from an actuarial standpoint will now be presented in greater detail.

1. Coverage was extended compulsorily to regularly employed domestic and farm employees; most Federal employees not covered under the civil-service retirement program; the nonfarm self-employed

¹ Certain provisions in these amendments were further changed in 1952. The changes which are significant from an actuarial standpoint are described in the following section, Social Security Act amendment of 1952.

other than doctors, lawyers, engineers, and members of certain other professional groups; employees and the self-employed in Puerto Rico and the Virgin Islands; and a few other small occupational classes. In addition, two categories of employees were given the opportunity to be covered on a voluntary basis—employees of nonprofit institutions and employees of State and local governments who are not under retirement systems.

2. Benefits are paid in certain circumstances in which no benefits would formerly have been paid.

(a) The requirements for fully insured status were liberalized by introducing a new starting date for determining such status. This "new start" enables many persons at least 65 years of age who did not meet the former requirements to become immediately eligible to receive retirement benefits. It also removes the disadvantage the newly covered groups would otherwise have faced in acquiring eligibility.

(b) Provisions defining dependency were modified to permit the payment of survivor benefits to all unmarried children under 18 years of age whose mothers were currently insured at time of death.

(c) Several new benefits for dependents and survivors of insured persons were added. Benefits equal to 50 percent of the primary insurance amount are payable to a wife, under 65 years of age, of an old-age (primary) beneficiary as long as she has in her care a child entitled to benefits on her husband's earnings. In certain instances benefits are payable to the dependent husband, aged 65 or over, of a retired female beneficiary, and also to the aged surviving dependent widower of a deceased woman worker. Husband's and widower's benefits are equal to 50 and 75 percent, respectively, of the primary insurance amount.

(d) The provisions governing the withholding of benefits because of work in covered employment were liberalized. Eligible persons at least 75 years of age can receive benefits regardless of the amount of their earnings in covered employment. Those under 75 years of age may earn as much as \$50 a month in covered employment and still receive benefits.

(e) Lump-sum death benefits are paid even though monthly benefits are payable to survivors for the month in which the wage earner died.

(f) Monthly benefits are paid retroactively for a period up to 6 months prior to the month in which an application was filed provided the beneficiary was eligible therefor.

3. Larger benefits will be paid to future beneficiaries as well as to persons on the rolls.

(a) The maximum amount of annual taxable earnings was raised to \$3,600.

(b) For persons having at least 6 quarters of coverage after 1950, the average monthly wage may be calculated over all years after 1936 or after 1950, whichever yields the larger primary insurance amount, except that in the case of individuals born after 1928, the 1950 starting date must be used.

(c) For persons whose average monthly wage is calculated on the basis of wages and self-employment income after 1950, the monthly primary insurance amount will be 50 percent of the first \$100 of average monthly wage, plus 15 percent of the next \$200. The minimum primary insurance amount ranges from \$25 for persons with average

monthly wages between \$35 and \$50, down to \$20 for persons with average monthly wages below \$31.

(d) For persons already on the beneficiary rolls, benefits were increased by means of a conversion table contained in the new amendments. This table increased primary insurance benefits by varying percentages ranging from 100 percent for the smallest benefit to 50 percent for the largest benefit. Where the wage earner lacks 6 quarters of coverage after 1950, benefits to future beneficiaries will be based on an average monthly wage computed over all years after 1936. In all cases where the average monthly wage is computed over all years after 1936, including cases referred to in subparagraph (b) above, benefits will be computed by the old formula, except that no 1-percent increment will be included for years after 1950. The amounts so computed are then increased by means of the conversion table.

(e) Parent's benefits were increased to 75 percent of the primary insurance amount. Child-survivor benefits were increased so as to pay to each child the sum of (1) 50 percent of the primary insurance amount, and (2) 25 percent of the primary insurance amount, divided by the number of child beneficiaries in the family. The amount of the lump-sum death payment was changed from 6 times the primary insurance benefit to 3 times the primary insurance amount.

(f) The maximum monthly amount of family benefits payable with respect to one wage record is the smaller of \$150 or 80 percent of the average monthly wage, provided that the latter limit may not reduce benefits below \$40.

4. Wage credits of \$160 a month are given to persons for each month of service in World War II, unless benefits (other than ordinary veteran's benefits) based on such service are payable by another Federal retirement system. No provision is made to reimburse the trust fund from the general funds of the Treasury for the additional costs arising from such wage credits. Accordingly these additional costs are borne by the trust fund.

The survivorship protection provided to certain World War II veterans by the Social Security Act amendments of 1946 was not changed by the present amendments. However, the additional costs of these benefits which formerly were met from general funds will, effective September 1, 1950, be borne by the trust fund.

5. Contribution rates for employees and employers are 1½ percent each on taxable wages for calendar years 1951-53; 2 percent each for calendar years 1954-59; 2½ percent each for calendar years 1960-64; 3 percent each for calendar years 1965-69; and 3¼ percent each thereafter. The contribution rates on self-employment income are equal to 1½ times the corresponding employee rates.

The provision which was added to the Social Security Act in 1943 authorizing appropriations to the trust fund from general revenues when needed to meet costs was eliminated.

SOCIAL SECURITY ACT OF 1952

The 1952 amendments to the Social Security Act, which became law during the early part of the fiscal year ending June 30, 1953, will, as in the case of the 1950 amendments, affect the level and incidence of disbursements of the trust fund both in the immediate and long-term future. The important changes significant from an actuarial standpoint are as follows:

1. Larger benefits will be paid to beneficiary families on the rolls as well as to virtually all future beneficiary families.

(a) For persons whose average monthly wage is calculated on the basis of wages and self-employment income after 1950, the monthly primary insurance amount will be 55 percent of the first \$100 of average monthly wage, plus 15 percent of the next \$200. The minimum primary insurance amount is \$25 for persons whose average monthly wage is under \$35, and \$26 for persons with average monthly wages from \$35 to \$47.

(b) For persons already on the beneficiary rolls whose benefits were determined by the conversion table, benefits were increased by the use of a new conversion table in which all primary insurance amounts in the table of the 1950 law were increased by \$5 or 12½ percent, whichever was larger. This new conversion table will be applicable in determining benefits for all future beneficiaries whose average monthly wage will be computed over all years since 1936.

(c) The maximum monthly amount of family benefits payable with respect to 1 wage record is the smaller of \$168.75 or 80 percent of the average monthly wage, provided that the latter limit may not reduce benefits below \$45.

2. The provision governing the withholding of benefits because of work in covered employment was liberalized. The amount which eligible persons under age 75 may earn in covered employment and still receive benefits was increased to \$75 a month.

3. The provisions granting wage credits of \$160 for each month of active military service during World War II were extended to cover military service during the period after July 24, 1947, and before January 1, 1954.

4. Provisions were included which indicate a way of preserving the insured status and accrued benefit amounts of persons who become permanently and totally disabled. These provisions have no actual effect on benefit rights, since the provisions expire on June 30, 1953, a date prior to the earliest time permitted for filing application. The financial effect of these provisions was, therefore, ignored in the estimates contained in this report.

Actuarial estimates, prepared at the time the 1952 amendments were considered by Congress, indicate that on an intermediate basis the level-premium cost of the system is 5.85 percent of payroll.² Since according to this estimate these amendments did not affect the actuarial balance of the program, the schedule of contribution rates in the 1950 amendments which placed the system on a self-supporting basis was continued by the Congress.

NATURE OF THE TRUST FUND

Amounts accumulated under the old-age and survivors insurance program are held in the Federal old-age and survivors insurance trust fund, and financial operations under the program are handled through this fund. The primary source of the fund's receipts is amounts deposited in or appropriated to it under permanent appropriation on the basis of contributions paid by workers and their employers, and by individuals with self-employment income, in employments covered

² Source: Actuarial Cost Estimates for the Old-Age and Survivors Insurance System as Modified by the Social Security Act Amendments of 1952, prepared for the use of the Committee on Ways and Means by Robert J. Myers, actuary to the committee, dated July 21, 1952.

by the old-age and survivors insurance program. All employees and their employers in employments covered by subchapter A of chapter 9 of the Internal Revenue Code (Federal Insurance Contributions Act) or under State agreements made pursuant to section 218 of the Social Security Act, as amended, are required to pay contributions with respect to the wages of individual workers. All individuals with self-employment income covered by subchapter E of chapter 1 of the Internal Revenue Code are required to pay contributions with respect to their self-employment income. In general, an individual's contributions are computed on annual wages or self-employment income, or both wages and self-employment income combined, up to a maximum of \$3,600, with the contributions being determined first on the wages and then on any self-employment income necessary to make up the \$3,600.

Except for amounts received by the Secretary of the Treasury under State agreements and deposited in the trust fund, all contributions are collected by the Bureau of Internal Revenue and are paid into the Treasury as internal-revenue collections. Sums equivalent to 100 percent of the taxes imposed under subchapter E of chapter 1 and subchapter A of chapter 9 of the Internal Revenue Code are transferred to the trust fund from time to time on the basis of estimates made by the Secretary of the Treasury. Proper adjustments are made periodically to the extent that the estimates are subsequently found to differ from the actual amounts of contributions payable.

Although the Social Security Act of 1935 fixed the contribution rates for employees and their employers at 1 percent each on taxable wages for the calendar years 1937-39 and provided for higher rates thereafter, subsequent acts of Congress extended the 1-percent rates through calendar year 1949. On January 1, 1950, the rates rose to 1½ percent each for employees and employers, in accordance with the provisions of the Social Security Act amendments of 1947. The Social Security Act amendments of 1950 provide that these 1½-percent rates shall remain in effect through calendar year 1953, and that the rates shall rise to 2 percent each on January 1, 1954, to 2½ percent each on January 1, 1960, to 3 percent each on January 1, 1965, and to 3¼ percent each on January 1, 1970. Beginning January 1, 1951—the effective date of extension of coverage to self-employed persons—the rates of tax on self-employment income are equal to 1½ times the corresponding employee rates.

The second source from which receipts of the trust fund are derived is interest received on investments held by the fund. The investment procedures of the fund are described later in this section.

The Social Security Act amendments of 1946 added section 210 to the Social Security Act. This section provided survivors insurance protection to certain World War II veterans for a period of 3 years following their discharge from the Armed Forces. Section 210 (d) authorized Federal appropriations to reimburse the Federal old-age and survivors insurance trust fund for such sums as were withdrawn to meet the additional cost (including administrative expenses) of the payments under this section. Under the Social Security Act amendments of 1950 this survivors insurance protection was continued, but the resulting additional cost was to be met from the trust fund beginning September 1, 1950.

Public Law 642, enacted June 14, 1948, which amended the definition of the term "employee" as used in the Social Security Act,

resulted in the exclusion from coverage of certain services previously held covered. While the amended definition was made retroactive to 1937, certain wage credits established under the former definition will remain credited to the individual's account. The law authorizes an appropriation to the trust fund from general revenues equal to the estimated total amount of benefits paid and to be paid that would not have been paid had the amended definition been in effect beginning in 1937.

Public Law 234, enacted October 30, 1951, amended the Railroad Retirement Act to provide a new basis of coordinating the railroad retirement program with old-age and survivors insurance. The new legislation provides that the railroad wage credits of workers who die or retire with less than 10 years of railroad employment shall be transferred to the old-age and survivors insurance system. The situation will be unchanged for workers who acquire 10 years or more of railroad service. That is, the survivors of over-10-year railroad workers will, as under the 1946 amendments to the Railroad Retirement Act, receive benefits under one program or the other based on combined wage records, while retirement benefits will in most cases be payable under both systems to individuals with 10 or more years of railroad service who also qualify under old-age and survivors insurance.

With respect to the allocation of costs between the two systems, Public Law 234 requires the Railroad Retirement Board and the Federal Security Administrator to—

determine, no later than January 1, 1954, the amount which would place the Federal Old-Age and Survivors Insurance Trust Fund in the same position in which it would have been at the close of the fiscal year ending June 30, 1952, if service as an employee after December 31, 1936, had been included in the term "employment" as defined in the Social Security Act and in the Federal Insurance Contributions Act.

The legislation provides that beginning with fiscal year 1953, and for each fiscal year thereafter, annual interest payments on this amount (less any offsets described below) are to be transferred from the railroad retirement account to the trust fund. The legislation further provides that at the close of fiscal year 1953 and each fiscal year thereafter annual reimbursements are to be effected between the railroad retirement account and the trust fund in such amounts as would, taking into consideration the amount determined for the period through June 30, 1952, place the trust fund at the end of the year in the same position in which it would have been if railroad employment were covered under the Social Security Act. If the reimbursement is from the trust fund to the retirement account the Federal Security Administrator may offset the amount of such reimbursement against the amount determined for the period through June 30, 1952.

The Comptroller General of the United States, in a decision (B-4906) dated October 11, 1951, held that receipts derived from the sale of miscellaneous supplies and services may be credited to and form a part of the trust fund, where the initial outlays therefor were paid from the trust fund. Formerly, these moneys were credited to the general fund of the Treasury as miscellaneous receipts.

Expenditures for benefit payments and administrative expenses under the old-age and survivors insurance program are paid out of the trust fund. These expenditures for the fiscal year 1946 and¹ previous years included such reimbursements to the Treasury for administrative expenses incurred under the program as were authorized by sec-

tion 201 (f) of the act. Successive acts of Congress have modified the procedures in accounting for these expenses. Thus, during fiscal years 1947 and 1948 progressively increasing portions of the program's administrative expenses incurred by the Federal Security Agency were charged directly to the trust fund and not reimbursed from the fund as they had been in the preceding fiscal years. Beginning with fiscal year 1949, all expenses incurred by all offices of the Federal Security Agency in carrying out the provisions of title II of the Social Security Act, as amended, are charged directly to the trust fund. Under the President's Reorganization Plan No. 2, effective July 16, 1946, the Federal Security Administrator certifies benefit payments to the managing trustee, who makes the payments from the trust fund in accordance therewith. Prior to July 16, 1946, certifications for payments were made by the Social Security Board. Payments are made from an uninvested balance held in the fund to the account of the disbursing officer of the Treasury.

With respect to wages paid prior to 1951, refunds to employees who worked for more than one employer during the course of a year and paid contributions on such wages in excess of the statutory maximum, were made from general revenues. With respect to wages paid after 1950, these refunds will be paid from the Treasury account for refunding internal-revenue collections. The Social Security Act amendments of 1950 direct the managing trustee to pay from time to time from the trust fund into the Treasury as repayments to the account for refunding internal-revenue collections the amount estimated by him to be contributions which are subject to refund with respect to wages paid after 1950.

The managing trustee invests that portion of the trust fund which, in his judgment, is not required to meet current expenditures for benefits or administration. The Social Security Act restricts permissible investments of the trust fund to interest-bearing obligations of the United States Government or to obligations guaranteed as to both principal and interest by the United States. Obligations of these types may be acquired on original issue at par or by purchase of outstanding obligations at their market price. In addition, the Social Security Act authorizes the issuance of special obligations exclusively to the trust fund. Such special obligations are required to bear interest at a rate equal to the average rate of interest, computed as of the end of the calendar month next preceding the date of their issue, borne by all interest-bearing obligations of the United States forming a part of the public debt (where such average rate is not a multiple of one-eighth of 1 percent, the rate of interest on such special obligations is required to be the multiple of one-eighth of 1 percent next lower than such average rate).

Interest on public issues held by the trust fund is received by the fund at the time the interest becomes payable on the particular series held. Interest on special issues is received semiannually—generally on June 30 and December 31. Public issues acquired by the fund may be sold at any time by the managing trustee at their market price. Special issues may be redeemed at par plus accrued interest. Interest receipts and proceeds from the sale or redemption of obligations held in the trust fund are available for investment in the same manner as other receipts of the fund.

Interest earned by the invested assets of the trust fund will provide income to meet a portion of the benefit disbursements. Benefit

disbursements are expected to increase markedly over a long period because the number of persons aged 65 and over will be increasing for many decades, and because an increasing proportion of such aged persons will be qualifying for benefits under the old-age and survivors insurance system.

On June 30, 1952, there were about 13,300,000 persons aged 65 and over, a number equivalent to about 8 percent of the total population. It is estimated that by the end of the century the number of persons aged 65 and over may be double that on June 30, 1952, and represent from 10 to 13 percent of the population. The effect on the finances of the old-age and survivors insurance system of this expected change in the number of aged persons will be even greater than may at first appear, because, compared with the present situation, a much larger proportion of aged persons 50 years hence is expected to be eligible to receive benefits under the program. The future financial soundness of this system, with its rising rate of disbursements, is of the utmost importance to the millions of persons who are already within its scope and to the Nation as a whole.

The trust fund, furthermore, serves in part as a reserve against short-run fluctuations in total contributions and benefit amounts, providing a margin of safety against relatively short-term contingencies to insure the payment of benefits without sharp changes in rates paid by contributors. These reserves will provide additional resources against a sudden increase in total benefit amounts or a sharp decline in contributions, both of which could occur simultaneously during any reversal in business activity.

SUMMARY OF OPERATIONS OF TRUST FUND, FISCAL YEAR 1952

A statement of the income and disbursements of the Federal old-age and survivors insurance trust fund in the fiscal year which began on July 1, 1951, and ended on June 30, 1952, and of the assets of the fund at the beginning and end of the fiscal year, is presented in table 1.

TABLE 1.—Statement of operations of the Federal old-age and survivors insurance trust fund during the fiscal year 1952¹

Total assets of the trust fund, June 30, 1951		\$14,735,566,707.01
Receipts, fiscal year 1952:		
Insurance contributions:		
Appropriations	\$3,568,556,584.22	
Deposits, arising from State agreements	25,691,615.30	
Total insurance contributions	\$3,594,248,199.52	
Transfers from general fund	3,734,000.00	
Reimbursements for sale of surplus material, services, etc.	23,908.92	
Interest on investments	333,514,115.23	
Total receipts	3,931,520,223.67	
Disbursements, fiscal year 1952:		
Benefit payments	1,982,377,418.11	
Administrative expenses	84,673,377.98	
Total disbursements	2,067,050,796.09	
Net addition to trust fund		1,864,469,427.58
Total assets of the trust fund, June 30, 1952		16,600,036,134.59

¹ On basis of Daily Statement of the U. S. Treasury.

The total receipts of the trust fund during the fiscal year 1952 amounted to \$3,931.5 million. Of this total, \$3,568.6 million represented amounts appropriated to the fund in accordance with the continuing appropriation in section 201 (a) of the Social Security Act as

amended on the basis of contributions paid under subchapter E of chapter 1 and subchapter A of chapter 9 of the Internal Revenue Code. An additional \$25.7 million represented amounts received by the Secretary of the Treasury in accordance with State agreements made pursuant to section 218 of the Social Security Act as amended, and deposited in the trust fund. The combined amount of \$3,594.2 million, appropriated or deposited, represented a 15-percent increase over appropriations in the preceding fiscal year. This increase resulted from the fact that (1) insurance contributions from self-employed persons, to whom coverage was extended as of January 1, 1951, were payable at the time they filed income tax returns, which in most instances, occurred during January–March 1952; and (2) the increase from \$3,000 to \$3,600 in the maximum amount of annual taxable earnings became effective January 1, 1951, with the result that the higher maximum taxable amount which was in effect during only half of fiscal year 1951, was in effect during the entire fiscal year 1952. The other \$337.3 million of receipts consisted primarily of \$333.5 million of interest on investments of the fund and \$3.7 million transferred from general funds of the Treasury in accordance with section 210 (d) of the Social Security Act, as amended in 1946 and in effect prior to the enactment of the Social Security Act amendments of 1950.

Disbursements from the trust fund during the fiscal year 1952 total \$2,067.1 million, of which \$1,982.4 million consisted of benefit payments, and \$84.7 million for administrative expenses of the insurance program. The total amount of benefits paid during the fiscal year exceeded benefits paid in the fiscal year 1951 by 32 percent. This increase was due chiefly to the fact that provisions of the Social Security Act amendments of 1950, which were effective during the entire fiscal year 1952 but during only part of fiscal year 1951, resulted in (1) a larger number of persons drawing benefits primarily because of the liberalized qualifying requirements, and (2) higher benefit amounts payable to all beneficiaries.

Administrative expenditures of the fund were 2.4 percent of contribution income and 4.3 percent of benefit payments during fiscal year 1952. Figures for each of the years 1941–52 are shown in table 2.

The distribution of benefit payments in fiscal years 1951 and 1952 by type of benefit is shown in table 3. Approximately 78 percent of the total benefit payments from the fund in the fiscal year 1952 were accounted for by monthly benefits to aged persons—retired wage earners and their wives (including a relatively small number of wives under age 65) or dependent husbands, and aged widows, dependent widowers, and dependent parents of deceased wage earners. Approximately 19 percent of the 1952 benefit payments represented monthly benefits on behalf of children of deceased or retired workers and payments to mothers—practically all of them under age 65—who had children of deceased wage earners in their care. The balance of the benefits paid in the fiscal year 1952 consisted of lump-sum payments in cases where the insured individual died before September 1950 leaving no survivor immediately eligible for monthly benefits, and in all cases where the insured individual died after August 1950.

FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND 11

TABLE 2.—*Relationship of administrative charges against old-age and survivors insurance trust fund to old-age and survivors insurance contribution income and benefit payments*

Child's (children under 18 of deceased workers).....	210.6	14	274.3	14
Mother's (widows or dependent divorced wives of deceased workers caring for child beneficiary).....	68.6	5	85.7	4
Lump-sum benefits (wage earner died after August 1950, or before September 1950 with no survivor immediately eligible for monthly benefits).....	45.5	3	58.3	3

¹ Less than 0.5 percent.

At the end of the fiscal year 1952, approximately 4.6 million persons in about 3.3 million families were receiving monthly benefits at an annual rate of \$1,941 million. At the end of the preceding fiscal year, the monthly benefit rolls included 4.0 million persons in about 2.9 million families to whom monthly benefits were being paid at an annual rate of \$1,725 million. Average monthly family benefits at the end of June 1952 were, in most cases, slightly lower than the corresponding averages a year earlier (table 4). This decrease is explained primarily by the proportionately larger number of beneficiaries whose benefits were based on the lower average earnings of persons who were insured only because of the liberalized insured status provisions of the 1950 amendments. Payments to retired workers with no dependents receiving benefits averaged \$40.10, a decrease of 80 cents. The average for a retired worker and his aged wife was \$70.10, 30 cents less than a year earlier. For survivors,

12 FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND

payments to aged widows averaged \$36.00; families made up of a widowed mother and one child averaged \$77.50; widowed mothers and 2 children averaged \$93.80.

TABLE 4.—Estimated number of families and beneficiaries receiving benefits and average monthly family amount, by family group, end of fiscal years 1951 and 1952

Family classification of beneficiaries receiving benefits	June 30, 1951			June 30, 1952

¹ Benefits of children were being withheld.

NOTE.—Estimates were prepared October 1952.

The total assets of the old-age and survivors insurance trust fund amounted to \$14,736 million on June 30, 1951. These assets increased to \$16,600 million by the end of the fiscal year 1952, as the result of an excess of receipts over disbursements amounting to \$1,864 million during the fiscal year. Table 5 shows a comparison of the total assets of the trust fund and their distribution at the end of the fiscal years 1951 and 1952. The assets of the fund at the end of the fiscal year 1951 consisted of \$16,273 million in the form of obligations of the United States Government, \$112 million to the credit of the fund account, and \$215 million to the credit of the disbursing officer.

The Government obligations held in the trust fund consist of special certificates issued directly to the fund and bonds issued to the public. The asset value of the special certificates is their par value. The asset value of the bonds, as carried on the books of the Treasury Department, is the book value—par value plus unamortized premium outstanding.

In accordance with the provisions of section 201 (c) of the Social Security Act, as amended, the managing trustee invested during fiscal

year 1952 that portion of the assets of the trust fund which, in his judgment, was not required to meet current withdrawals. This section provides that direct obligations of the United States Government as well as obligations guaranteed as to both principal and interest by the United States may be acquired through purchase of outstanding obligations in the open market or on original issue at par. Prior to fiscal year 1948, and again beginning with fiscal year 1951, investments made for the fund consisted only of direct obligations of the United States purchased on original issue. During each of the fiscal years 1948-50, however, investments included purchases of outstanding obligations of the United States in the open market.

¹ On basis of Daily Statement of the U. S. Treasury.

² Par value plus unamortized premium outstanding.

The par value of the net increase in the investments owned by the fund during the fiscal year 1952 amounted to \$1,951 million. New securities whose gross purchase price totaled \$15,855 million were acquired through the investment of receipts of the fund and the reinvestment of funds made available from the maturity of securities during the year. The par value of securities redeemed during the fiscal year was \$13,904 million consisting of \$12,096 million of 2½-percent special certificates of indebtedness and \$1,808 million of 2¼-percent special certificates of indebtedness. All of the new securities acquired during the year were in the form of special certificates of indebtedness, \$1,808 million of which were redeemed during the year and \$14,047 million of which mature on June 30, 1953. These certificates were acquired at par and bear an interest rate of 2¼ percent. This rate was determined by the average rate of interest

on the interest-bearing public debt which prevailed at the end of the month preceding the date of issue of these securities.

The average rate of interest on the interest-bearing public debt at the end of a month, which determines the interest rate at which special obligations are issued to the trust fund during the following month, varies with changes in the composition of the public debt and with changes in the particular rates of interest on different classes of securities. During the period August 31, 1947, to May 31, 1951, the average rate of interest on the public debt fluctuated between $2\frac{1}{8}$ and $2\frac{1}{4}$ percent with the result that all special obligations issued to the trust fund beginning with September 1947 and ending with June 1951 carried an interest rate of $2\frac{1}{8}$ percent. On June 30, 1951, the average rate of interest on the public debt was 2.270 percent and during the following fiscal year showed a slight upward trend, reaching 2.310 percent on May 31, 1952. Because the rate exceeded $2\frac{1}{4}$ percent but remained less than $2\frac{3}{8}$ percent at the end of each month in the period from June 30, 1951, to May 31, 1952, the interest rate on all special issues acquired during the fiscal year was $2\frac{1}{4}$ percent.

STATEMENT OF THE EXPECTED OPERATIONS AND STATUS OF THE TRUST FUND DURING FISCAL YEARS 1953-57

The Board of Trustees is required under the provisions of section 201 (b) of the Social Security Act, as amended, to report each year to the Congress on the expected operations and status of the trust fund during the next ensuing 5 fiscal years. The Board is required to include in the report estimates of both the income and the disbursements of the trust fund in each of the 5 years.

The income of the fund depends on the amount of taxable payrolls and self-employment income in covered industries, rates of contributions, and interest earnings of the fund. The disbursements from the fund depend on the number of persons eligible for benefits, the proportion who apply for and receive benefits, and the amounts of benefit to which they are entitled on the basis of past earnings. Consequently, both the income and the disbursements of the fund not only depend on the legislative provisions but they are also affected by the general economic conditions.

Estimates of the income and disbursements of the trust fund for each of the 5 fiscal years 1953-57, together with the resulting assets of the trust fund at the beginning and the end of each year, are presented in table 6. In addition, the figures on actual experience in earlier fiscal years are shown.

TABLE 6.—Operations of the Federal old-age and survivors insurance trust fund, fiscal years 1937-57, subject to the assumptions and limitations stated in the text¹

¹ In interpreting the estimates in this table, reference should be made to the accompanying text which describes the underlying assumptions. Past experience on basis of Daily Statement of the U. S. Treasury. Estimates were prepared February 1953.

² Totals shown in this and other columns do not necessarily equal the sum of rounded components.

³ Include insurance contributions, adjusted for refunds, and transfers from general funds equivalent to additional payments arising from the extension of survivors insurance protection to certain veterans of World War II (Social Security Act amendments of 1946). Estimated contributions for fiscal years 1953-57 are based on statutory rates.

⁴ Includes profits on marketable investments amounting to \$193,668 in 1949 and \$8,934 in 1950.

⁵ Represent charges against trust fund in respective fiscal years; administrative expenses, after adjustment for bookkeeping transfers, were about \$30 million in fiscal year 1944 and about \$29 million in fiscal year 1945.

For this report, it is assumed that the present statutory provisions relating to old-age and survivors insurance will remain unchanged throughout the period under consideration. The computations of tax income are based on present statutory rates of contribution which are 1½ percent each on employer and employee on wages paid during the calendar years 1952 and 1953 and 2 percent each during the calendar years 1954 through 1957; and 2¼ percent on the taxable income from self-employment in calendar years 1952 and 1953 and 3 percent in calendar years 1954-57.

In table 6 single estimates are given for fiscal years 1953 and 1954, but for fiscal years 1955 to 1957 two sets of estimates are presented based on alternative economic assumptions. Alternative I shows the effect of assumption postulating a relatively high level of economic activity; alternative II shows the effect of the assumption of a somewhat lower level of economic activity.

Alternative I, which shows a relatively large increase in trust-fund assets, is based on the assumption that a high level of employment and

earnings is maintained through calendar year 1954, with a mild economic recession beginning early in 1955. The period of recession is assumed to be brief and recovery fairly rapid, beginning after June 1955. Employment and earnings are then assumed to continue to increase through 1957. The earnings of the self-employed are assumed to follow a similar pattern. Benefit disbursements are assumed to increase substantially, primarily because of the long-range upward trend in the number of beneficiaries, and partly because of the combined effect of the alternative method of computing benefit amounts, which became effective in calendar year 1952, and the higher benefit amounts payable under the 1952 amendments.

Under alternative I, aggregate income during the period of 5 fiscal years ending in 1957 would amount to \$28.7 billion, including \$26.2 billion in contributions and \$2.4 billion in interest. Aggregate disbursements for the period would be about \$17.5 billion with the highest expected annual disbursement about \$4.2 billion. The trust fund at the beginning of the fiscal year 1953 would amount to about 3.9 times the highest expected annual disbursements during the succeeding 5 fiscal years.

The other set of estimates for fiscal years 1955-57, alternative II, is based on the assumption of an economic recession beginning in the latter half of calendar year 1954 and becoming somewhat more severe than that assumed under alternative I, and with less rapid recovery beginning at the end of 1956. As a result, estimated taxable payrolls and earnings of the self-employed in the periods affecting tax collections during fiscal years 1955-57, and therefore estimated contributions, are lower under alternative II than under alternative I. Estimated benefit disbursements, on the other hand, increase more rapidly under alternative II than under alternative I because a larger number of older workers withdraw from or are unable to find jobs in covered employment.

The aggregate income of the fund for the 5 fiscal years 1953-57 under alternative II would amount to \$26.6 billion, including \$24.3 billion in contributions and \$2.3 billion in interest. Aggregate disbursements would be \$18.4 billion, with the highest expected annual disbursement about \$4.6 billion. The trust fund at the beginning of the fiscal year 1953 would amount to about 3.6 times the highest expected annual disbursement during the period.

Public Law 234, enacted October 30, 1951, amended the Railroad Retirement Act to provide a new basis of coordinating the railroad retirement program with old-age and survivors insurance. A description of the legislative provisions governing the allocation of costs between the two systems is contained in an earlier section of this report entitled "Nature of the Trust Fund." Both agencies are jointly engaged in conducting the necessary actuarial studies and analyses required by these financing provisions. Pending their completion, the estimates shown in table 6 have not been adjusted to reflect the effect of future transfers between the railroad retirement account and the trust fund.

Public Law 642, enacted June 14, 1948, which amended the definition of the term "employee" as used in the Social Security Act, resulted in the exclusion from coverage of certain services previously

held covered. While the amended definition was made retroactive to 1937, certain wage credits established under the former definition remained credited to the individual's account. The law authorized an appropriation to the trust fund from general revenues equal to the total amount of benefits paid and to be paid, as estimated by the Federal Security Administrator, that would not have been paid had the amended definition been in effect beginning in 1937. An estimate was prepared and submitted to Congress based on the provisions of the Social Security Act in effect prior to enactment of the 1950 amendments. A revised estimate reflecting recent legislation is in course of preparation and, accordingly, income from this source is excluded from the appropriations shown in table 6.

The 1950 and 1952 amendments to the Social Security Act contain provisions which substantially affect benefit payments. The 1950 legislation provided for (1) an increase in benefits averaging about 77½ percent to old-age insurance beneficiaries on the rolls on August 31, 1950, and also increased benefits to all future beneficiaries; (2) more liberal insured status requirements which made about 675,000 persons, aged 65 or more, immediately eligible for old-age insurance benefits; and (3) the removal of the work clause entirely for persons at least 75 years of age, which made it possible for about 75,000 persons to receive old-age insurance benefits who otherwise would not have received them. The 1952 legislation provided for a further increase in benefits. As a consequence of these and other provisions benefit disbursements during the 5 fiscal years 1953-57 will be on a much higher level than the benefit disbursements made under the old law.

During the next 5 years, benefit disbursements, like contributions, will be dependent to a considerable extent upon economic developments and so will have a considerable range of possible variation. The number of workers in covered employment, their distribution among different classes of workers (e. g., older workers, very young workers, women workers not previously engaged in covered employment, etc.), and the level of wages will all have a decided effect upon the amount of benefit payments to be anticipated.

In general, the larger the volume of employment the larger will be the number of workers who are insured under the program, and therefore the larger will be the number of deaths which will give rise to valid claims for survivors' benefits. However, over the short range the amount paid out for survivors' benefits will not be affected significantly by variations in economic conditions. While favorable opportunities for employment will operate to increase the number of insured persons, and hence increase the number of new death claims, such a high employment situation will tend to have counterbalancing effects such as that of inducing many of the widows and older children eligible for survivors' benefits to forego them by working in covered employment. On balance, the amount paid out for survivors' benefits over the next few years will differ so little whether the economic conditions of alternative I or alternative II are assumed that a single set of estimates is deemed appropriate for both alternatives (table 7).

18 FEDERAL OLD-AGE AND SURVIVORS INSURANCE TRUST FUND

TABLE 7.—Treasury disbursements for benefit payments, distributed by classification of beneficiaries, fiscal years 1941–57, subject to the assumptions and limitations stated in the text¹

¹In interpreting the estimates in this table, reference should be made to the accompanying text which describes the underlying assumptions. Estimates were prepared February 1953.

²Totals do not necessarily equal the sum of rounded components.

³Partly estimated.

On the other hand, the lower the level of employment during the next 5 years the larger will be the volume of benefit payments to retired workers who have attained age 65, and to their eligible dependents. As is indicated in table 8, a considerable proportion of the workers aged 65 and over who were eligible for old-age (primary) benefits in the past remained in covered employment (or, if they left covered employment, later returned to it) and did not receive benefits. Since fiscal year 1945, however, this proportion has decreased as the number of retired workers receiving benefits increased relatively more rapidly than the number eligible for old-age benefits. The proportion of eligible workers receiving benefits on January 1, 1951 (table 8), would probably have been higher if it had not been for the fact that, for a large number of workers newly eligible as a result of the liberalized insured status provisions of the 1950 amendments, claims for benefits had been received but had not yet been completely processed.

TABLE 8.—Workers eligible for and receiving old-age (primary) benefits by attained age, fiscal years 1941-57, subject to the assumptions and limitations stated in the text¹

Middle of fiscal year (Jan. 1)	All workers aged 65 and over			Workers aged 65-69			Workers aged 70 and over

¹ In interpreting the estimates in this table reference should be made to the accompanying text which describes the underlying assumptions. Estimates were prepared February 1953. No adjustments have been made to reflect changes arising from (1) provisions that coordinate the old-age and survivors insurance and railroad retirement programs, and (2) wage credits for military service.

² Figures for 1941-52 are partly estimated.

Although the proportion of eligible workers receiving benefits on January 1, 1953, is lower than it was a year earlier, the upward trend in this proportion is expected to continue even under the favorable employment conditions assumed in alternative I. Many persons in newly covered occupations, with little or no covered employment before 1951, became fully insured for the first time in 1952. Since these newly insured persons were fairly regularly employed, relatively few filed application for old-age (primary) benefits, thus depressing the proportion of all eligible persons in receipt of such benefits on January 1, 1953.

If the lower employment conditions assumed in alternative II should materialize, it is expected that larger proportions of eligible workers will be obliged to leave covered employment especially at ages 65-69. Hence, despite a slightly smaller number of eligible workers, the number receiving old-age (primary) benefits under alternative II would considerably exceed that under alternative I. Moreover, it is expected that the average old-age (primary) benefit amount payable under alternative II would exceed the average under alternative I, inasmuch as many of the more steadily employed, and therefore higher paid, older workers who would not withdraw from

covered employment under the conditions of alternative I would not be employed under the conditions of alternative II. In consequence, alternative II would result in a substantially higher volume of benefit payments to old-age (primary) beneficiaries and their dependents.

Table 8 contains an analysis of workers eligible for old-age (primary) benefits by age attained as of the middle (January 1) of each of the fiscal years 1941 through 1957. The growth in the number of eligible workers aged 65-69 was gradual but uninterrupted during the calendar years 1941 to 1949, inclusive. This growth resulted partly from the increase in the population at these attained ages, but primarily from the fact that each passing year a larger proportion of the persons attaining age 65 had fully insured status. In the calendar year 1940, a worker attaining age 65 would not have been fully insured if he had left covered employment more than $1\frac{1}{2}$ or 2 years previous to his attainment of age 65—for example, due to a permanent disability—but in the calendar year 1949 numerous persons attaining age 65 were fully insured even though they left covered employment after reaching age 59.

The marked increase in the number of workers eligible for benefits in 1951 is due to the liberalized insured-status provisions of the 1950 amendments to the Social Security Act. The number of quarters of coverage needed to be eligible for old-age benefits just prior to the passage of these amendments ranged from 27 for persons then attaining age 65 down to 6 for persons then aged 76 and over. As a result of the 1950 amendments all persons now age 65 or over, or who will attain age 65 prior to July 1954, will be fully insured if they have the minimum number of six quarters of coverage. Consequently, the increase in the number of eligible persons on January 1, 1951, was greatest for the persons in the 65-69 age group. Although the same factors which contributed to the growth in the number of eligible persons before 1951 will continue to be operative after 1950 two new factors will have an even greater effect, namely, the liberalized insured-status provisions and the extension of coverage to new areas of employment.

The estimates presented above result in a net increase in the trust fund during the 5-year period of about \$11.1 billion under alternative I and about \$8.2 billion under alternative II. It is entirely possible under alternative I that the amount of contribution income may be greater and benefit payments lower than has been estimated. The total result would be an even greater growth in the trust fund than is indicated under this alternative. On the other hand, lower contribution and interest income together with higher benefit payments than shown under alternative II would lead to smaller net increases in the trust fund.

ACTUARIAL STATUS OF THE TRUST FUND

Section 201 (b) of the Social Security Act requires the Board of Trustees to present each year a statement of the actuarial status of the trust fund. The estimates presented in the previous two reports in regard to the system as modified by the 1950 amendments were prepared on exactly the same basis as the cost estimates made immediately following the end of World War II. Since the previous report, the old-age and survivors insurance program has been modified by the
